

## AQL Reporting Service – Data Mining, Management Reporting and backup service.

Use AQL RS to monitor diagnostic activity, identify service quality issues and to gain strategic insights to their customer needs and priorities.

- ✔ **Accessible** – intuitive web interface for accessing information stored on a SQL database anywhere, any time.
- ✔ **Secure** – backup for AQLnet users. Individual logins and tiered access provides users with a suite of reports tailored to their needs.
- ✔ **Flexible** – fast turn around on report modifications, ad hoc and new requirements.

## Product Features

- ✔ Pools the data collected using AQLnet;
- ✔ Based on Microsoft's Reporting Services;
- ✔ Supported on most browser interfaces;
- ✔ Complies with UK government security guidelines to level 2.
